

DRY TRANSFERS

- We can produce colour, multi colour or foil (silver, pale gold, rich gold) transfers
- We can produce photo quality dry transfers
- Transfers can be high or low tack
- Contact Matthew 020 7264 1295 or artwork@modelshop.co.uk

SERVICE OVERVIEW

This service is typically used by product designers for logos, numbering and lettering, or by architectural model makers for detailing on buildings such as windows and doors.

We have also undertaken work for the hobby market, producing detailing for trains and military vehicles.

ARTWORK PREPARATION

We will colour match your transfer to any Pantone, metallic or other reference.

Transfers can be produced with either a low or high tack adhesive on them depending on your requirements.

For single colour transfers provide the artwork in black with a colour reference.

For multi coloured transfers it is best to provide separated artwork with a reference for each colour.

We can separate artwork for you.

Artwork produced by us on computer from your annotated sketches will be faxed, emailed or posted to you so you can confirm that it is correct before the transfers are made.

FURTHER INFORMATION

- Go to www.modelshop.co.uk and look for BESPOKE SERVICES.
- Please note you will be charged for the film (one off charge) + the sheet price (see our website for current charges).
- For quotation for total cost of the transfer please email, fax or post us a sketch of your proposed design giving quantities, sizes, and any other information that is relevant.
