

We have an on-site workshop where we offer a number of bespoke services. We can combine these services as part of a single job eg making industry awards or dropping brass etched detailing into lasered recesses.

We have built up a reputation within the industry for producing the highest quality results in the shortest time possible. Our technicians will work with you until you are completely satisfied with the results.

You can visit our workshop at 10:30am on the last Wednesday of every month as part of our Workshop Insight Session (see website for details).

PHOTO ETCHING

The photo etching process allows us to transfer your drawings onto sheets of brass, nickel silver or copper.

RESIN & METAL CASTING

We can replicate most 3D objects in either resin or white metal.

DRY TRANSFERS

We can produce colour, multi colour or foil (silver, pale gold, rich gold) or photo quality transfers. Transfers can be high or low tack.

BESPOKE TREES

We can build trees to your specific requirements, pantone match foliage colours and build trees from photo references.

LASER CUTTING AND ENGRAVING

We can cut areas up to 1200 x 700mm and thicknesses from 0.1mm up to 10mm (depending on material) and engrave graphics up to 1000dpi.

IN-FILLING

We have developed several methods of in-filling and marking surfaces so can offer you the best solution suited to your individual project.

VINYL CUTTING

We specialise in precisely layered vinyl stickers for signs, wall decorations, window displays, banners & branding.

ARTWORK SERVICES

We can provide a full artwork service for all of our workshop processes.

For Bespoke Trees/Scenics contact workshop@modelshop.co.uk / 020 7264 1294
For all other services contact artwork@modelshop.co.uk / 020 7264 1295
